Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hahn et al. (USP 5,973,948). See figure 1a, on/off switch 42, see abstract and column 4, lines 51-59.
3. Claims 1-16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Lee (USP 5,159,545). See figures and abstract.

Response to Arguments

4. Applicant's arguments filed 2-8-2002 have been fully considered but they are not persuasive. Applicant's main point is that the reference does not teach the electronic circuit and the second connector form one rigid physical unit. It is clear that the reference teaches such. Lets look at the reference when a connector is connected to the unit it forms one rigid unit at the connection point, even APA (applicant's prior art) discloses such, the second connector is connected to the power converter a portion of the connector forms a rigid unit with the power output connector. The fact that it is as short as possible is simply a matter of engineering design choice. If a circuit/ load

requires a power supply to be as close as possible then it can simply be designed as such. However, a drawback to this would noise effects having a power supply being close to the circuit. So it is a matter of engineering design choice make the second connector as rigid and short as possible.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
